Course objective:
The Las Vegas Practice Growth Study Club is designed specifically for the practitioner that would like to increase their knowledge in the area of dental implants, patient acceptance and more importantly, practice growth. This program will address surgical, as well as, prosthetic techniques for single and multiple-unit restorations, implant over-dentures and fully edentulous cases. A comprehensive review of Biomet 3i’s latest implant treatment options, specifically, the Navigator Guided Surgery System, Encode Scanning Abutment, and fully edentulous DIEM technique utilizing Simplant Software. The format will consist of a combination of lectures, hands-on training and interdisciplinary treatment planning.
