SYNOPSIS:

In this course, closed dental malpractice claims will be analyzed to identify how and when dentists and their staff can implement risk management and ethical principles to enhance patient safety and reduce untoward outcomes. Topics include extractions and implants, patient selection and management considerations for ambulatory anesthesia and HIPAA/HITECH regulations as they relate to an online presence. There are no prerequisites.

LEARNING OBJECTIVES:

- Apply clinical risk management strategies to mitigate associated risk factors, improve patient safety, and reduce untoward outcomes and malpractice claims.
- Identify common medical conditions and potential complications that may present in the administration of anesthesia in an outpatient setting, and outline, through claim examples, best practices for patient selection, medical consult and emergency preparedness.
- Learn effective policies and procedures to help improve HIPAA/HITECH compliance in the dental practice.
